SHAKESPEAREAN TRAGEDIES

Macbeth

Macbeth
 Macbeth is a tragedy written by William Shakespeare shortly after his return from Scotland to England. It depicts the psychological and moral decline of a man who is led to kill King Duncan and take the throne by means of witchcraft and ambition.

CHARACTERISTICS OF SHAKESPEAREAN TRAGEDY

- 1. The protagonist is a nobleman of high rank.
- 2. The protagonist is a man of high moral character.
- 3. The protagonist is a man of high intelligence.
- 4. The protagonist is a man of high courage.
- 5. The protagonist is a man of high honor.
- 6. The protagonist is a man of high nobility.
- 7. The protagonist is a man of high dignity.
- 8. The protagonist is a man of high respectability.
- 9. The protagonist is a man of high esteem.
- 10. The protagonist is a man of high reputation.

Othello

Othello
 Othello is a tragedy by William Shakespeare, set in Cyprus and Venice. It tells the story of Othello, a Moorish general in the Venetian army, whose wife Desdemona is abducted by a Venetian nobleman.

Othello
 Othello is a tragedy by William Shakespeare, set in Cyprus and Venice. It tells the story of Othello, a Moorish general in the Venetian army, whose wife Desdemona is abducted by a Venetian nobleman.

King Lear

King Lear
 King Lear is a tragedy by William Shakespeare, set in Britain. It tells the story of King Lear, who divides his kingdom among his three daughters.

King Lear
 King Lear is a tragedy by William Shakespeare, set in Britain. It tells the story of King Lear, who divides his kingdom among his three daughters.

Hamlet

Hamlet
 Hamlet is a tragedy by William Shakespeare, set in Denmark. It tells the story of Prince Hamlet, who is haunted by the ghost of his father.

Hamlet
 Hamlet is a tragedy by William Shakespeare, set in Denmark. It tells the story of Prince Hamlet, who is haunted by the ghost of his father.

William Shakespeare
 William Shakespeare is a playwright and poet, born in Stratford-upon-Avon, England, in 1564. He is considered one of the greatest writers in the English language.

2. Acknowledgement
3. Aims and Objectives
4. Introduction
5. Organic farming
6. Vermi-composting
7. Conclusion

AIMS AND OBJECTIVES

Organic Farming:

- 1. Soil Health Enhancement:** The primary aim of organic farming is to improve and maintain soil health by employing practices such as crop rotation, composting, and natural fertilization. This ensures that the soil remains fertile, retains moisture, and supports diverse microbial life crucial for plant growth.
- 2. Environmental Sustainability:** Organic farming aims to minimize environmental impact by avoiding the use of synthetic pesticides, herbicides, and fertilizers. Instead, it emphasizes the use of natural inputs and ecological processes to enhance ecosystem resilience and reduce agricultural pollution.
- 3. Biodiversity Promotion:** Organic farming seeks to promote biodiversity by encouraging the presence of various plant species, beneficial insects, and soil organisms. This diversity helps control pests and diseases, improves pollination, and creates more resilient agroecosystems.

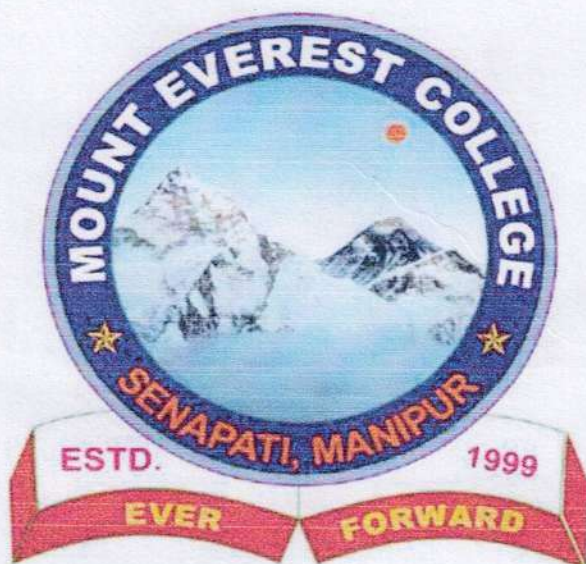

4. Healthier Food Production: By prioritizing natural methods of pest and weed control and avoiding the use of genetically modified organisms (GMOs) and synthetic chemicals, organic farming aims to produce food that is safer and healthier for consumers.

Vermicomposting:

- 1. Organic Waste Reduction:** Vermicomposting aims to divert organic waste from landfills and incinerators by utilizing earthworms to decompose organic materials such as kitchen scraps, yard waste, and agricultural residues.
- 2. Nutrient Recycling:** The primary objective of vermicomposting is to convert organic waste into nutrient-rich compost known as vermicompost or worm castings. This compost serves as a valuable soil amendment, supplying essential nutrients to plants and improving soil structure and fertility.
- 3. Soil Health Improvement:** Vermicompost enhances soil health by increasing microbial activity, improving soil structure, and enhancing nutrient availability. This leads to healthier

6. Floras found at Geljang Lake
7. Kangla Nongpok Torban
8. Floras found at Kangla Nongpok Torban
9. Conclusion

INTRODUCTION

A field collection trip is a journey of a group of people to a place away from their normal environment i.e., beyond the four walls of the classroom. The purpose of the trip is mainly as observation for education, non-experimental research and to provide students with experiences outside of their everyday activities like camping with teachers and with classmates. Field trip are also used to produce civilized young boys and girls who appreciate the environment, culture and the arts.

Teachers often take the time to learn about the destination and the subject before the trip. Activities that happens on the field trip often includes lectures, tours, that occur in the classroom once the field trip is completed.

Not only do field trip provide alternative educational opportunities, they can also benefit the community if they include some type of community service. Field trips also provide students the opportunity to take a break from their normal routine and experience more hands-on learning.

AIM AND OBJECTIVE OF THE STUDY TRIP

A field visit is very helpful for supplementing the theoretical knowledge we read in our book. It aims to interlink the facts with the practical field and teaches its significance. It builds interest of the students to get more knowledge about the places and the world around us and to increase their awareness. Students gain more knowledge and experience when they are exposed to the real situation than theoretical learning. So, in order to gain more knowledge and experience a trip to **“Geljang Lake”** and **“Kangla Nongpok Torban”** was considered as per the syllabus.

MAIN OBJECTIVE

1. To collect different specimen of plants for herbarium.
2. To study the flora and natural vegetation.
3. To acquire knowledge of different kinds of plants, habitats, etc.
4. To acquire knowledge about the natural ecosystem and bio-diversity.

14. Conclusion

AIM AND OBJECTIVE OF THE STUDY TOUR

In the new Education Policy, tour has been made an integral part of education curriculum. This including as a part of syllabus in Life Science has enabled students to gain field knowledge and experience in many ways. In Life Science, theoretical learning is incomplete without seeing the living organisms and their relations with the environment in different aspects of life. Students are to be exposed to real situation to gain practical knowledge by experiencing themselves. The study tour to Shillong is considered very essential on learning more about plants.

The main objectives of the field study tour are as follows:

- i. To study the external features of the plants which are found in that area.
- ii. To acquire the knowledge of different kinds of plants/ flowers
- iii. To explore and enjoy the site seeing of the entire Botanical Survey and the Indian Museum which is located in Shillong. *Guwahati*
- iv. To acquire the knowledge about the conservation of natural ecosystem and biodiversity of the region.

Q1 Dwell on the theme of fate versus free will in "The Mayor of Casterbridge".

→ Thomas Hardy born on 2 June, 1840 and died on 11 January, 1928 was an English novelist and poet. A Victorian realist in the tradition of George Eliot, he was influenced both in his novels and in his poetry by Romanticism, including the poetry of William Wordsworth. He was highly critical of much in Victorian society, especially on the declining status of rural people in Britain such as those from his native South-West England.

Many of Hardy's novel concern tragic characters struggling against their passions and social circumstances, and they are often set in semi-fictional region of

INTRODUCTION

FEMINIST THEORIES

The feminist theoretical perspective in sociology emerged as a major model that has significantly reshaped the discipline. By the research it spawned, feminist sociological theory is not only bridging the micro-macro gap, it has also illuminated the androcentric bias in sociology and in broader society. Disagreement remains on all elements that need to be included in feminist theory, but at a minimum, the consensus is that a theory is feminist if it can be used to challenge a status quo that is disadvantageous to women.

The feminist perspective provides productive avenues of collaboration with sociologists who adopt other theoretical views, especially conflict theory in its assertions that structured social inequality is maintained by ideologies accepted by both the privileged and the oppressed. Unlike conflict theory, feminist focus on women and their ability to amass resources from a variety of sources. In their individual lives and through social and political means, feminists work through a number of avenues to increase women's empowerment - the ability for women to exert control over their own destinies.
